

Dr. Jason E. Jannot

Analytical Services Program Manager

[Website](#) | [LinkedIn](#)

Summary

Currently serving as Analytical Services Program Manager in the Fisheries Monitoring and Analysis Division at NOAA's Alaska Fisheries Science Center.

Science leader with 15+ years of experience in fisheries monitoring and marine ecosystem research. Proven record of leading fisheries observer and electronic monitoring programs and projects, managing cross-functional teams, directing science and IT projects, and representing federal agencies before senior executives, management bodies, commercial fishing industry, and the public.

Key Competencies

- Implementing and managing large scale, environmental and oceanographic scientific data collection and monitoring programs and projects
- Managing and leading interdisciplinary teams of scientists
- Fostering collaboration and communication between staff, collaborators, and stakeholders
- Communicating with national and international stakeholders
- Communicating to the public and the press
- PhD, Biological Sciences, Purdue University, USA

Leadership skills

Communication, Strategic Planning, Stakeholder Management, Team Building, Conflict Resolution, Organization, Time Management

Technical skills

Data Science: R software, SQL, Git/GitHub **Web Design:** HTML, CSS

Dr. Jason E. Jannot

[LINKEDIN](#) • [GOOGLE SCHOLAR](#) • [PERSONAL WEBSITE](#) • [PROFESSIONAL WEBSITE](#)

EDUCATION

- 2005 **PhD Biological Sciences**
Purdue University, West Lafayette, Indiana, USA
- 2000 **MS Biology**
Montana State University, Bozeman, Montana, USA
- 1993 **BS Biological Sciences**
Allegheny College, Meadville, Pennsylvania, USA

CERTIFICATES

- 2025 **Project Management**
Federal Project Management Training, online, USA
- 2016 **Data Science**
University of Washington, Seattle, Washington, USA
-

PROFESSIONAL EXPERIENCE

- 2023–present **Analytical Services Program Manager (current)**
Deputy Division Director Monitoring and Analysis (acting) 2023-2026
US National Oceanic and Atmospheric Administration (NOAA)
Alaska Fisheries Science Center, Seattle, Washington, USA
- Drive strategic research priorities in collaboration with Center leadership
 - Evaluate Center, division, program, and project needs and priorities
 - Manage large-scale environmental monitoring programs
 - Lead science, data, and IT research projects and set research priorities
 - Lead, support, and deliver presentations, reports, and publications
- 2022–2023 **Data Services Division Manager**
International Pacific Halibut Commission, Seattle, Washington USA
- Oversee, develop, implement, and lead ocean monitoring programs, including evaluating division, program, and project needs and priorities
 - Lead science, data, and IT research projects and set research priorities
 - Lead, support, and deliver presentations, reports, and publications
- 2010–2022 **Research Biologist & Data Scientist**
US National Oceanic and Atmospheric Administration (NOAA)
Northwest Fisheries Science Center, Seattle, Washington, USA
- Lead, develop, and implement scientific projects to support ocean management
 - Conduct and publish peer-reviewed research
 - Develop and implement new and existing scientific sampling, analyses, and workflows
 - Mentor junior scientists, post-docs, and students
 - Maintain data quality, integrity, and confidentiality standards
 - Design info-graphics for stakeholders and the public
- 2009–2010 **Assistant Professor of Biology, Tenure Track**
Winthrop University, Rock Hill, South Carolina, USA
- Research focus: Ecological and evolutionary responses of insects to human-induced environmental change
 - Conduct and publish peer-reviewed research
 - Teach university courses in ecology, wetlands ecology, biological sciences
 - Mentor graduate and undergraduate students

PROFESSIONAL EXPERIENCE

- 2005–2009 **Postdoctoral Fellow, National Science Foundation**
Illinois State University, Normal, Illinois USA
- *Research focus: Geographic variation in body size of a flightless grasshopper*
 - *Conduct and publish peer-reviewed research*
 - *Mentor graduate and undergraduate students*
- 2001–2005 **Research Fellow**
Purdue University, West Lafayette, Indiana, USA
- *Research focus: Ecological and evolutionary responses of aquatic insects to human-induced environmental change*
 - *Conduct and publish peer-reviewed research*
 - *Mentor undergraduate students*
- 1993–2001 **Aquatic Ecology Technician (multiple positions)**
Montana State University, Bozeman, Montana, USA
US Forest Service, Hungry Horse, Montana, USA
DynCorp/Ohio EPA, Cincinnati, Ohio, USA
Idaho Power Company, Boise, Idaho, USA
- *Conduct field surveys and monitoring of freshwater streams, wetlands, and rivers*
 - *Ensure timely data collection and shipping of specimens and samples*

LEADERSHIP APPOINTMENTS

- 2024-2026 Board of Directors, Alaska Fisheries Science Center, NOAA Fisheries
- 2024-2026 IT Program Advisory Panel, Alaska Fisheries Science Center, NOAA Fisheries
- 2024-present Promotion Advisory Board, Alaska Fisheries Science Center, NOAA Fisheries
- 2024-present Inter-agency Pacific Halibut Workgroup, North Pacific Fisheries Management Council
- 2024-present Workforce Collaboration Team, Alaska Fisheries Science Center, NOAA Fisheries
- 2020-2022 National Bycatch Engineering Reduction Program, NOAA Fisheries
- 2020-2022 National Seabird Program Strategic Planning, NOAA Fisheries
- 2019 Delegate, Agreement on the Conservation of Albatross and Petrels, NOAA Fisheries
- 2019-2022 Short-tailed Albatross Recovery Team, USFWS
- 2018-2022 North Pacific Albatross Work Group, Inter-agency
- 2013-2022 Endangered Species Work Group, Pacific Fisheries Management Council

AWARDS

2020 Seattle Federal Executive Board Award
2015 Presidential Migratory Bird Federal Stewardship Award
2004 President's Award, Soc. Freshwater Science
2004 Best Oral Presentation in Basic Research, Soc. Freshw. Sci.
2002 Summer Research Fellowship, Purdue University
2002 Achieve Excellence Award, Purdue University
2001 Watt Scholarship, Rocky Mountain Biological Lab
2000 Fredrick N. Andrews Fellowship, Purdue University
1999 Outstanding Graduate Teaching, Montana State University
1998 Honorable Mention for Teaching, Montana State University
1992 Outstanding Scientific Scholarship, Allegheny College
1992 Alden Scholar, Allegheny College

GRANT FUNDING

Reducing Seabird Bycatch 2017-2020

1. Number of Grants: 5
2. Total Funding Awarded (US\$): 315 000

Insect Responses to Climate Change 1996-2009

1. Number of Grants: 9
2. Total Funding Awarded (US\$): 55 000

Published Software

- [bycatch](#) R package - This is a repository for applications of Bayesian models, using Stan for estimation. These models fit Bayesian GLMs, with or without time varying parameters, and with or without covariates to estimate rare events. The primary applications of these models are to estimate rare, protected species interactions with fishing vessels. This is part of the [NOAA Fisheries Integrated Toolbox](#).
 - Ward, EJ and **J Jannot**. bycatch: Using Bayesian generalized linear models for estimating bycatch rates and generating fleet-level expansions. doi: [10.5281/zenodo.11110994](#)

COURSES TAUGHT

Winthrop University, Assistant Professor (tenure track)

- Biological Principles, majors senior seminar course
- Wetlands Ecology, majors lecture and laboratory course
- Ecology, majors lecture and laboratory course
- Principles of Biology, introductory majors laboratory course

Illinois State University, Postdoctoral Researcher

- Introduction to Research, majors lecture and lab course
- Research Mentor, mentor students in research

Purdue University, Graduate Student Teaching

- Introduction to Ecology & Evolution, non-majors lecture and lab course
- Ecology, majors laboratory course
- Independent Study Program, mentor students in research

Montana State University, Graduate Student Teaching

- Cellular and Molecular Biology, majors laboratory course

Selected Projects

ANNUAL REPORT OF FISHERIES MONITORING

Timeframe

2023-present, annual reporting requirement

Goal

Summarize, analyze, and report on the performance of large scale fisheries monitoring project in waters off the coast of Alaska, USA (300+ scientists over 3.77 M km sq.)

Stakeholders

Fishing industry participants and representatives
US Federal government policy analysts and scientists
US public

Responsibilities & Key Achievements

- Plan scientific strategy and coordination
- Project management
- Lead cross-functional team of 13 staff, 2 offices
- Define scientific and policy objectives
- Ensure stakeholder engagement
- Quality control products and deliverables
- Ensure timely delivery
- Deliver oral and written products to public at public meetings
- Publish final technical report, [link](#)

ANNUAL DEPLOYMENT OF FISHERIES MONITORING

Timeframe

2023-present, annual requirement

Goal

Develop a cost-effective and scientifically sound method for deploying fisheries scientists and electronic monitoring in fisheries off the coast of Alaska, USA.

Stakeholders

Fishing industry participants and representatives
US Federal government policy analysts and scientists
US public

Responsibilities & Key Achievements

- Plan scientific strategy and coordination
- Project management
- Lead cross-functional team of 12 staff, 2 offices
- Define cost-effective, scientific objectives
- Ensure stakeholder engagement
- Quality control products and deliverables
- Ensure timely delivery
- Deliver oral and written products to public at public meetings
- Publish final technical report, [link](#)

NEW TECHNOLOGY TO IMPROVE FISHERIES LAW ENFORCEMENT

Timeframe

2023-2024

Goal

Develop new database and associated software for rapid documentation of potential fisheries violations by scientists deployed on commercial fishing vessels in Alaska, USA

Stakeholders

US Federal fisheries law enforcement agencies
US Federal government policy analysts and scientists
US public

Responsibilities & Key Achievements

- Plan scientific strategy and coordination
- Project management
- Lead technical IT team of 5 staff
- Define cost-effective, scientific objectives
- Collaborate and communicate with technology end-users
- Ensure product requirements are met
- Ensure timely delivery of high-quality product
